

Turnkey Plant & Equipment Financing

With a \$250,000 initial draw down threshold and \$20million+ maximum, **Turnkey P&E Financing** provides an all-inclusive turnkey option for growing middle market companies to add capital equipment.

In addition to financing the equipment, customers may include as many soft cost options as required, including deposits & pre-payments, site preparation, installation, support equipment, software staff training, etc.

Typical middle market companies with whom we partner tend to have \$6M or greater in current revenue, and prefer to include high dollar installation and associated start up costs with their financing rather than taking out additional bank loans or depleting working capital.
